AST Achieves 'Public Sector Partner' Status with Amazon Web Services (AWS)

Lisle, IL October 1, 2018: AST today announces its partnership with Amazon Web Services as a Public Sector Partner in the AWS Partner Network. The AWS Public Sector Partner program recognizes organizations with state-of-the-art solutions and the ability to build, integrate, and accelerate AWS offerings for government, education, and non-profit clients globally.

AST's achievement of this distinction is the result of its elite Public Sector customer references, exclusive professional training, and ongoing investment in the AST Center of Excellence for AWS Solutions. As an AWS Public Sector Partner, AST boasts dozens of AWS Certified consultants, as well as proven AWS solutions for clients of all sizes, including:

- AWS Monitoring and Compliance
- AWS Managed DevOps
- Autonomous Cloud Tester (Powered by AWS)

This is AST's second APN designation, following closely behind its initial recognition as APN Consulting Partner. In an effort to better serve clients across multiple industries and with a variety of cloud platform needs, AST continues to pursue collaboration and partnership opportunities within the AWS Partner Network.

"AST is thrilled that our expertise and decades of experience working with the Public Sector have been recognized by AWS through its Public Sector Program," says Subhasis Ganguly, AST's VP of Managed Services. "This accreditation is a reflection of our success in migrating client applications to AWS, and teaching customers about the cost, security, agility, and innovation benefits that AWS brings to the table. We're excited about our future endeavors with Amazon and what this powerful partnership can do for our clients."

The AST and AWS partnership will focus on driving accelerated digital transformation in the Public Sector.

About Amazon Web Services (AWS)

Amazon Web Services (AWS) is a secure cloud services platform, offering compute power, database storage, content delivery, and other functionality to help businesses scale and grow. Millions of customers leverage AWS cloud products and solutions to build sophisticated applications with increased flexibility, scalability, and reliability. Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world. With data center locations in the U.S., Europe, Brazil, Singapore, Japan, and Australia, customers across all industries are taking advantage of AWS' benefits.

About Applications Software Technology (AST) LLC

AST is an award-winning full-service enterprise systems integrator, serving clients in the Public and Commercial Sectors for more than two decades. Clients look to AST for leadership and assistance in systems integration, business process redesign, project management, systems administration, and training. From on-premise applications to modern cloud technology, AST's services encompass all aspects of Enterprise Resource Planning, Business Intelligence, Enterprise Performance Management, Customer Experience, and Middleware. AST also offers flexible Managed Services, supporting the needs of over 200 Public Sector and Commercial customers around the globe.
